Subject: Summary of MA Samples
Importance: High

Jerry, Will give you a summary of the status of MA samples at this time.

- Have received to date all 50 packs required of eleven (11) brands.
- Four brands were submitted 10/20/97. The tobacco weight was completed and samples sent to B. Handy 10/23. Ventilation was completed 10/23. Smoking will be completed on these samples 10/24. pH on these samples will be analyzed 10/27.
- Four more brands were received within the CQS system 10/23/97. These four brands will be opened and placed into ISO conditions 10/24. The tobacco weights will be completed on 10/27 and filler samples taken to B. Handy. Ventilation will be completed on 10/27. The smoking will start for these samples on 10/28.
- Talked with Section 11 and they will possibly get more brands sent out tonight. They have missed their 3:00 deadline with FedEx. They will try and send them out Airborne. If not we will not get them until Monday.
- Looks like we may have a problem with purchasing six brands. They have sent a file down from NYO giving the store name, store number, store address etc. where all of the brands are available. We are going to work with this file and see if it can be reduced to a readable format and then possibly fax it to MA.

We will see you in the morning at 9:00.
